

## ABSTRACT

A teaching pendant enabling device includes first enabling signal circuit (C1), second enabling signal circuit (C2), first monitor circuit (C3) and second monitor circuit (C4) which are formed of contacts included in right and left deadman switches (1a and 1b) and those included in relays (R1 and R2.) The first monitor circuit (C3) and the second monitor circuit (C4) are supplied with electric power from an internal power source (2) via a main switch (15.)
